

Morgan Ellery

Operations Data Analyst

Portland, OR | (503) 555-0142 | morgan.ellery@email.example | morganellery.example/portfolio

SUMMARY

Operations data analyst with 4 years of experience turning warehouse and delivery data into weekly decisions. I build SQL and Python reporting that teams actually use, and I like training people to answer their own questions with data. Looking for an analyst role in supply chain or logistics.

SKILLS

Analysis: SQL (PostgreSQL), Python (pandas), Excel (pivot tables, Power Query), forecasting, A/B test basics

Reporting: Tableau, Looker Studio, Google Sheets, dashboard design, data documentation

Operations: Inventory planning, carrier cost analysis, process mapping, SLA tracking

EXPERIENCE

Operations Data Analyst

Mar 2023 – Present

Larkspur Logistics, Portland, OR

- Built a daily late-shipment report in SQL and Tableau that 6 regional leads review each morning; on-time delivery rose from 91% to 96% over 9 months.
- Automated the weekly carrier cost reconciliation in Python, cutting it from 6 hours to 40 minutes.
- Analyzed 120,000 pick events with the warehouse team to redesign pick-zone labels; average pick time fell 14%.
- Ran 12 lunch-and-learn sessions that taught 30+ coordinators to use self-serve dashboards.

Junior Data Analyst

Jun 2021 – Feb 2023

Bramble & Finch Outfitters, Remote

- Maintained inventory forecasts for 1,800 SKUs across 3 warehouses; stockouts on top sellers fell 22% year over year.
- Merged sales data from 2 e-commerce systems into one reporting table used by finance and buying.
- Documented 15 recurring reports so anyone on the team could run them during vacations.

PROJECTS

City Bike-Share Demand Dashboard

2022

Personal project

- Cleaned 2 years of open trip data (1.4M rows) and published a dashboard showing peak demand by station and hour.

EDUCATION

B.S. Economics, Minor in Statistics

2021

Halden State University, Portland, OR

Capstone: forecasting regional parcel volumes with seasonal models.
